No 1. A new American Atlas, containing Maps of the several States of the North American Union, projected and drawn on a uniform scale of fifteen miles to the inch, from documents found in the public offices of the United States, and state governments: to which are added, Maps of the World and Quarters; one of North America on four sheets, and one of South America on two sheets, together with a Geographical Memoir, giving a detailed account of the materials used in the construction of the various Maps. The whole exhibiting a full and complete geographical view of the two continents of North and South America, in connexion with the other parts of the known world. This work has already passed through two editions, within the period of two years, and has received the approbation and patronage of many of the most distinguished, scientific, and literary characters both in this country and in Europe; special resolutions of Congress and other public bodies in its favour have been passed, and as the author is constantly engaged in the improvement of the plates, by inserting all new information, he trusts that it will continue to be what it has
